

## Neighborhood planners and residents

It's already happening right now in my neighborhood. I live in a neighborhood away from the city. The neighborhood is beautiful! Summer neighborhood! But many people live there who also need schools, daycare centers, health posts and policing. So, we started doing it ourselves by signing with all the residents, due to the covid 19 crisis, many people lost their jobs, but as we became close to rural producers, we got together and started to set up the local business, with the help of the social media. and one resident helping the other. We gained political visibility, we got asphalt, and now we are looking for other resolutions for the neighborhood! But, all of this was done with the help and cooperation of almost all residents.
