App: A way to see the amount of people in public places.

The app is made for the user to be able to see how the public places in one city to be able t onavigate when their are festivities, at night or during day time where to eat. One might want to plan ahead where you want to bring you friends to eat picnic on a sunny summer day – one might want to sit where it is very crowded and therefore use the app as a tool to get aroung the city.
